

Fibo TSCA and CARB Statement

Dated September 1st 2020

Fibo certify that Fibo Wall Panels imported into the United States complies with EPA's Toxic Substance Control Act, TSCA Title VI and CARB Phase 2.

High Pressure Laminate
(functioning membrane)

7-layers,
WBP birch plywood

Balancing Laminate

Fibo Wall Panels are made from HPL decorative laminates glued to 7-layer birch plywood. The HPL itself is exempt from CARB and EPA Composite Wood Rule, and all our plywood imported to the United States have the correct certificates and documentation in order.

The panels are marked showing the production date, name and address of manufacturer and statement of compliance.
