

Vito Poplar Panel

Advantages

- **Decorative** and natural appearance
- **Genuine wood** surface
- **The surface** can be treated with varnish to enhance the wood structure and alter the appearance
- **Excellent screw-holding** properties
- **Easy to work with** thanks to the integrated click system that hides the joints
- **Sustainable** product made of wood.

Areas of use

- Vito Poplar Panel is ideal for walls where a seamless representation of natural wood is desired. The panels have a hidden fastening system, making installation simple and resulting in a seamless outcome.
- The Vito Poplar Panel can be used in all dry rooms

Facts

- **The Poplar** Panel consists of 5 layers of high-quality poplar veneer with an invisible click-lock system for hidden fixing to the back wall to provide a smooth and naturally beautiful appearance
- **Measurements:** 10 (D) x 620 (W) x 2400 (L) mm
- **Application Area:** Dry rooms
- **Fire classification:** D-s1-d0
- **Sealant:** Fibo Seal can be used in joints and to seal the system (i.e., around doors/windows and against ceiling/floor)
- **Recommended additional products:** We recommend the use of Fibo Screws (article no. 810006/810007/810011) to ensure a guaranteed fit in the invisible locking system
- **Lead time:** 2-3 weeks

Decors

- Vito Poplar Panel is available in one decor: Poplar
