

INDOOR WALLPANELS
COLLECTION 2025

Walls built for life

WELLBEING, RELAXATION, AND FUNCTIONALITY

From the very beginning, Fibo's focus on innovation has been our greatest driving force. Wet rooms leave little room for error. Our products are tested to meet the highest wet room standards, and it's why building contractors, architects, homeowners, developers, and skilled tradespersons all choose Fibo.

CREATE YOUR DREAM BATHROOM

Our bathrooms are perhaps our most personal and intimate space in the home. Once seen as a place to cleanse our bodies, they are now a place of sanctuary. Somewhere where we go to escape the stresses of everyday life and to feel rejuvenated.

Almost everyone visiting your home sees your bathroom. As well as providing a relaxing atmosphere, it should be easy to clean, hygienic and functional by design.

5231 BOTTLE GREEN M78

2332 SANDSTONE

A NEW BATHROOM IN A CLICK!

Fibo wall panels are easy to assemble. Our innovative wall system is 100% waterproof and is delivered ready to assemble, saving you both time and money. Get the bathroom you've always wanted for a great price!

GOOD FOR YOU AND YOUR SURROUNDINGS

Our products are made of certified renewable wood, without harmful chemicals and have a lower CO² footprint than if you chose to have a tiled bathroom.

AT HOME WITH NATURE

Scandinavian design represents the simple and the functional. We want solutions that provide a sustainable lifestyle. Not only for ourselves, but for nature and the people around us.

WOOD

Wood 4633 DARK WOOD M76

NATURAL WOOD STRUCTURE

With their authentic wood texture, these panels capture the warmth and character of natural materials. The tactile surface softens the space and adds a calming, organic feel.

Layer with cotton, linen, wool, ceramics, or glass to elevate the natural expression.

And yes, these panels are fully waterproof when installed as part of the Fibo System—beauty and function, perfectly combined.

STONE

STONE STRUCTURES AND NATURAL FINISHES

Our mineral-inspired decors give your walls a naturally refined look. This season, we’re adding four striking stone styles to the collection—including Beige Stone and Grey Stone, both finished in a luxurious Extreme Matte you’ll want to see—and feel—up close.

With a variety of tile patterns available, you can tailor the look to suit your space. Just remember: the tile layout plays a big role in the final expression, so take a moment to explore your options. See pg. 15 for available tile styles.

Stone decors also pair effortlessly with our solid color panels. Mix, match, and create a combination that feels just right.

3D

THE MOST TACTILE SURFACE

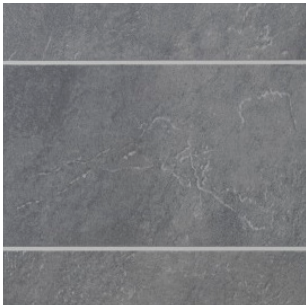

Panels in this collection feature synchronized variations in height and texture—both in the surface and the joints—creating a true three-dimensional, lifelike effect.

The 3D decors are crafted with realistic joint lines approximately 1/4 inch wide, though slight variations can occur. These joints aren’t milled; they’re built into the surface itself for a seamless, natural look.

Please note: 3D panels are available exclusively in the 24” x 12” tile pattern.

FIBO FIRE-RATED PANEL

The Fibo Fire Rated Panel is a premium building solution that delivers both safety and style. With a fire classification of B-s1, d0, it meets strict standards while maintaining the high quality and durability Fibo is known for.

Certified by Sintef for use in wet rooms, the panel is completely waterproof, backed by a 15-year warranty, and built to last 30+ years.

Crafted from 1/4" high-pressure compact laminate, it features an integrated locking system for quick installation and seamless joints—no additional finishing required. This rare combination of fire safety, easy handling, and clean design sets the Fibo Fire Rated Panel apart from the rest.

FACTS

Measurements: ¼ x 24 x 108 inches

Application Area: All rooms, including wet rooms.

Fire Classification: Contributes very limitedly to fire, produces very limited smoke, and does not form burning droplets.

CLASS A RATING (ASTM E-84)

Profiles: Fibo Fire Rated Panel profiles are available for both internal and external corners.

Sealant: Standard sealant is used in joints, and fire sealant must be used to seal the system around doors/windows and against the ceiling/floor.

THE EXPANDED ROLE OF THE KITCHEN

We spend more time at home than ever—cooking, working, relaxing, and creating. Our spaces should reflect who we are and adapt to everything we do. That’s why when it’s time to renovate, we want results that are not only beautiful, but ready right away.

NATURAL COMFORT AT THE HEART OF THE HOME

The kitchen is more than a place to cook—it’s where we come together. It’s a space for connection, creativity, quiet moments, and everyday life. Today, we’re looking for choices that support a sustainable lifestyle—not just for ourselves, but for the world around us.

TIMELESS STYLE. INSTANTLY.

Fibo Kitchen Board is the fastest way to refresh your kitchen with a personal, lasting touch. Choose from a wide range of low-maintenance, easy-to-clean panels designed to stand up to daily life. Fibo Kitchen Board is available in 24” W x 18” H x 3/8” D and installs directly on the framework or over existing walls—just follow the instructions included or visit fibosystemusa.com. A stylish, high-quality result is just around the corner.

Kitchen Board 0384 POLISHED STONE KM00

Kitchen Board 4746 Grey/Sahara KM3010

Kitchen Board 2159 LIGHT WOOD

STRONG, STYLISH, AND MADE TO LAST

Fibo Kitchen Boards feature a robust plywood core, giving you a durable, decorative wall surface that installs easily and covers imperfections beneath. The smooth finish is simple to wipe clean—perfect for busy kitchens.

INSPIRED BY NATURE. DESIGNED FOR LIFE.

Rooted in Scandinavian design, our solutions embrace simplicity, functionality, and sustainability—for you, your home, and the environment we all share.

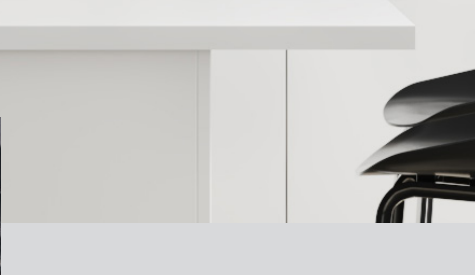

More about
KITCHEN BOARDS

KITCHEN WALLS THAT WORK AS HARD AS YOU

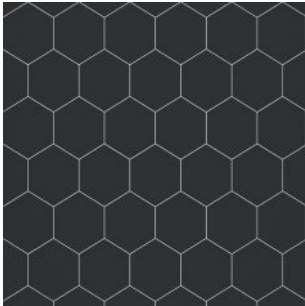

Fibo Kitchen Board is a smart, stylish solution that protects your walls from water, steam, and cooking grease. With seamless joints and a clean transition from countertop to backsplash, it's as functional as it is beautiful—built to handle daily life with ease.

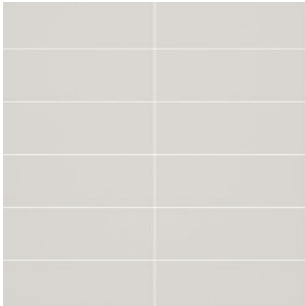

More about
KITCHEN BOARD

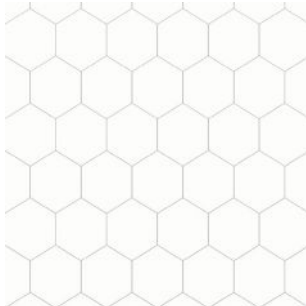

Please note!
If your stove emits heat over 176°F (80°C) toward the back wall, a heat protection panel must be installed in front of the Fibo Kitchen Board. While our panels meet fire classification C (ASTM E-84), they are made from wood-based materials and should be protected in high-heat zones.

A SIMPLE AND COMPLETE SOLUTION WITH FIBO'S WALL PANEL SYSTEM

Base profile Internal corner profiles External corner profiles Other profiles

Fibo's wall system provides a 100% waterproof wall with all the necessary approvals for wet rooms. The system comes as a complete set with panels, accessory products, and profiles that simplify the installation process and ensure a perfect result.

WATERTIGHT WITH AQUALOCK CLICK-LOCK SYSTEM

Fibo's wall panels come with a unique Aqualock click-lock system for easy installation. To ensure a waterproof surface and an approved bathroom, installation must always be done using Fibo Seal in joints, Fibo's own profiles and accessory products, and in accordance with the current installation guide. Watch our installation videos on fibosystemusa.com.

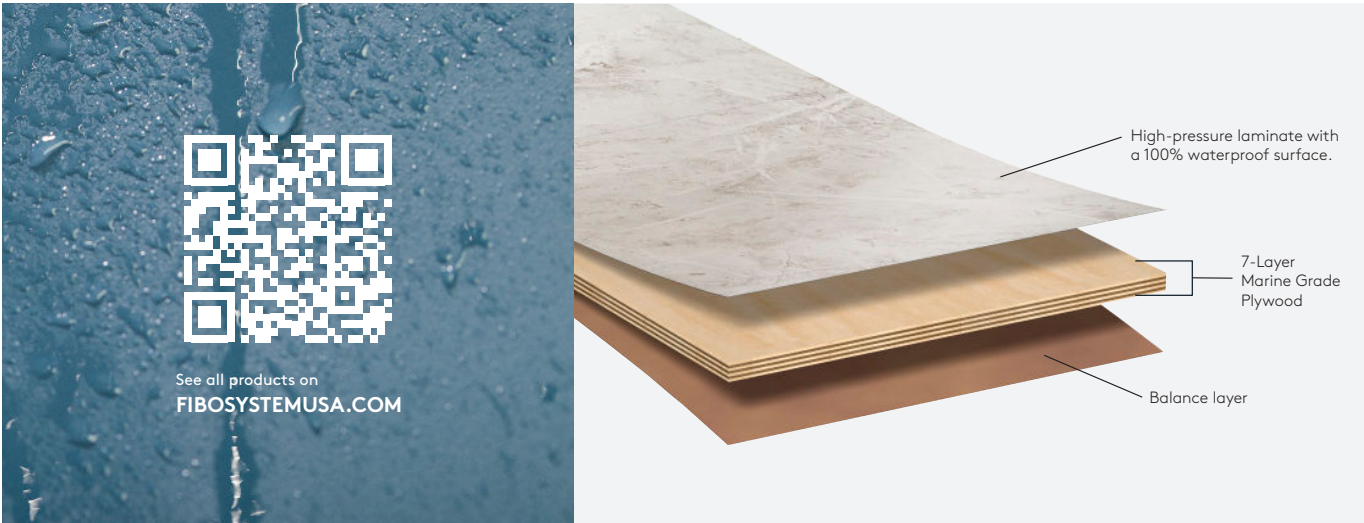

ANTIBACTERIAL BENEFITS

All Fibo wall panels now come with a documented antibacterial effect. Our panel surfaces contain no harmful substances, require no special maintenance, and are tested according to the ISO 22196 standard - this means that it is virtually impossible (99.99%) for E. coli and Staphylococcus bacteria to survive. The certification covers all our panel decors, both with and without design patterns.

PANEL SIZES

The standard size of our wall panels is 3/8 x 24 x 94.5 but some of our decors are available in a wider width of 48 inches and some are available in heights of 107 and 118 inches. See our website to find out what is available: fibosystemusa.com.

Kitchen Boards are panels in the standard size of 3/8 x 24 x 18 inches, designed for the splash zone between the kitchen counter and wall cabinets. These panels protect the wall from splashes of water and cooking.

Fibo wall panels are made with a core of plywood produced from PEFC-certified wood species. The panels are pressed and covered with high-pressure laminate to create the membrane on the front. By using Fibo Seal in the joints, you achieve a 100% waterproof and environmentally friendly wall tailored to your needs.

*Fibo offers a limited lifetime warranty for residential installations and a 25 year warranty for commercial installations.

FIBO | WALLS BUILT FOR LIFE

Why Fibo is
the sustainable choice

THE SUSTAINABLE CHOICE

UP TO 45% LOWER CARBON EMISSIONS COMPARED TO TILES

An independent report from the consulting firm Asplan Viak documents that a bathroom constructed with Fibo results in up to 45% lower carbon emissions compared to a tiled bathroom. The calculations consider the overall carbon footprint, from production, transport, and installation to the point where the product has broken down and returned to nature. To find out how much lower your carbon footprint can be than tile scan the QR code to view the full report.

A SMART CHOICE FOR BOTH THE ENVIRONMENT AND YOUR WALLET

At Fibo, we are dedicated to sustainability. We have set specific goals and committed to environmental responsibility by adhering to both the ESG (Environmental, Social, Governance) framework and the UN’s sustainability goals. Our factory in Lyngdal is ISO14001 certified, the gold standard in environmental management systems. Our wall panels are made from PEFC-certified wood, guaranteeing sustainable forestry, and they come with their own EPD that documents environmental calculations for both raw materials and production.
